

# Emerging Infectious Diseases

Tracking trends and analyzing new and reemerging infectious disease issues around the world

Molecular Identification of Unculturable Infectious Agents	S-J. Gao
DNA Vaccines	R.G. Whalen
Conjugate Vaccines and <i>Haemophilus influenzae</i> Type b	M.L. Barbour
Molecular Techniques and Microsporidia	D.P. Fedorko
Coccidioidomycosis	T.N. Kirkland
Antibody-Based Therapies	A. Casadevall
HIV-1 Group O Virus in the United States	M. Rayfield
Morbilliviruses in Dolphins	J.K. Taubenberger
Spotted Fever Rickettsiosis	B.L. Smoak
Heterogeneous HIV-1 in the Central African Republic	M. Massanga
<i>Legionella</i> -Like Amebal Pathogens	A. Adeleke
Enterovirus 71 and Acute Flaccid Paralysis	E.E. da Silva
Bancroftian Filariasis	D.F. Thompson
Yellow Fever in Kenya	E.J. Sanders
Paramyxovirus in Pteropus Bats	P.L. Young

Emerging Infectious Diseases is indexed in Current Contents and in several electronic databases.

## Liaison Representatives

Anthony I. Adams, M.D.  
Chief Medical Adviser  
Commonwealth Department of  
Human Services and Health  
Canberra, Australia

David Brandling-Bennett, M.D.  
Deputy Director

Atlanta, Georgia, USA

## Emerging Infectious Diseases

*Emerging Infectious Diseases* is published four times a year by the National Center for Infectious Diseases, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road., Mailstop C-12, Atlanta, GA 30333, USA. Telephone 404-639-3967, fax 404-639-3039, e-mail [eideditor@cidod1.em.cdc.gov](mailto:eideditor@cidod1.em.cdc.gov).

The opinions expressed by authors contributing to this journal do not necessarily reflect the opinions of CDC or the institutions with which the authors are affiliated.

All material published in *Emerging Infectious Diseases* is in the public domain and may be used and reprinted without special permission; proper citation, however, is appreciated.

Use of trade names is for identification only and does not imply endorsement by the Public Health Service or by the U.S. Department of Health and Human Services.

## Editorial and Computer Support

*Emerging Infectious Diseases* receives editorial and computer support from the Office of Planning and Health Communication, National Center for Infectious Diseases.

### Editorial Support

Maria T. Brito  
Beatrice T. Divine M.B.A.  
Carol D. Snarey, M.A.

### Production

Martha F. Boyd  
Teresa D. Walter

### Electronic Distribution

Carol Y. Crawford

## Electronic Access to *Emerging Infectious Diseases*

If you have Internet access, you can retrieve the journal electronically through file transfer protocol (FTP), electronic mail, or World-Wide Web (WWW).

The journal is available in three file formats: ASCII, Adobe Acrobat (.pdf), and PostScript (.ps). The ASCII version of the journal does not contain figures. Both the .pdf and .ps files, however, contain graphics and figures and are true representations of the hard copy of the journal. The Adobe Acrobat format requires an Adobe Reader. This reader is available in DOS, Windows, UNIX, and Macintosh versions. Installation instructions come with the Adobe software.

### Access Methods

**FTP:** Download the journal through anonymous FTP at <ftp.cdc.gov>. The files can be found in the pub/Publications/EID directory in each of the file types listed above.

**WWW:** Launch WWW browser for the Internet and connect to the following address: <http://www.cdc.gov>. Your WWW software will allow you to view, print, and retrieve journal articles.

**LISTSERV (e-mail lists):** You may have the table of contents sent to your e-mail box by subscribing to the EID-TOC mailing list. When you subscribe to this list, you automatically receive the table of contents and will be able to receive individual journal articles by FTP or e-mail.

If you choose to receive the entire journal, you may subscribe to one of three other lists. EID-ASCII sends the journal in ASCII format. EID-PDF sends the journal in Adobe Acrobat format. You can get the free Adobe Acrobat Reader by subscribing to the list. EID-PS sends the journal in PostScript format. However, because of the large file sizes and the complexity of sending the journal to different e-mail systems,

it is strongly recommended that if you have FTP capabilities, you choose to access EID through FTP rather than by e-mail lists.

To subscribe to a list, send an e-mail to [lists@list.cdc.gov](mailto:lists@list.cdc.gov) with the following in the body of your message: subscribe listname (e.g., subscribe EID-ASCII). Once you have requested a subscription, you will receive further instructions by e-mail. For more information about receiving *Emerging Infectious Diseases* electronically, send an e-mail to [eidhelp@cidod1.em.cdc.gov](mailto:eidhelp@cidod1.em.cdc.gov).

## Editorial Policy and Call for Articles

The goals of the *Emerging Infectious Diseases (EID)* journal are to promote the recognition of emerging and reemerging infectious diseases and improve the understanding of factors involved in disease emergence, prevention, and elimination.

Emerging infections are new or newly identified pathogens or syndromes that have been recognized in the past two decades. Reemerging infections are known pathogens or syndromes that are increasing in incidence, expanding into new geographic areas, affecting new populations, or threatening to increase in the near future.

*EID* has an international scope and is intended for professionals in infectious diseases and related sciences. We welcome contributions from infectious disease specialists in academia, industry, clinical practice, and public health as well as from specialists in economics, demography, sociology, and other disciplines whose study elucidates the factors influencing the emergence of infectious diseases. Inquiries about the suitability of proposed articles may be directed to the editor at 404-639-3967 (telephone), 404-727-8737 (fax), or [ededitor@cidod1.em.cdc.gov](mailto:ededitor@cidod1.em.cdc.gov) (e-mail).

*EID* is published in English and features three types of articles: Perspectives, Synopses, and Dispatches. The purpose and requirements of each type of article are described in detail below.

---

## Instructions to Authors

Manuscripts should be prepared according to the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (*JAMA* 1993;269[17]: 2282-6).

Begin each of the following sections on a new page and in this order: title page, abstract, text, acknowledgments, references, each table, figure legends, and figures. On the title page, give complete information about each author (full names and highest degree). Give current mailing address for correspondence (include fax number and e-mail address). Follow Uniform Requirements style for references. Consult *List of Journals Indexed in Index Medicus* for accepted journal abbreviations. Tables and figures should be numbered separately (each beginning with 1) in the order of mention in the text. Double-space everything, including the title page, abstract, references, tables, and figure legends. Italicize scientific names of organisms from species name all the way up, except for vernacular names (viruses that have not really been speciated, such as coxsackievirus and hepatitis B; bacterial organisms, such as pseudomonads, salmonellae, and brucellae).

All articles are reviewed by independent reviewers. The Editor reserves the right to edit articles for clarity and to modify the format to fit the publication style of *Emerging Infectious Diseases*.

Documents sent in hardcopy should also be sent on diskette, or by e-mail. Acceptable electronic formats for text are ASCII, WordPerfect, AmiPro, DisplayWrite, MS Word, MultiMate, Office Writer, WordStar, or Xywrite. Send graphics documents in Corel Draw, Harvard Graphics, Freelance, or save as .TIF (TIFF), .GIF (CompuServe), .WMF (Windows Metafile), .EPS (Encapsulated Postscript), or .CGM (Computer Graphics Metafile). The preferred font for graphics files is Helvetica. If possible, convert Macintosh files into one of the suggested formats. Submit photographs as glossy, camera-ready photographic prints.

Send all manuscripts and correspondence to the Editor, *Emerging Infectious Diseases*, National Center for Infectious Diseases, Centers for Disease Control and Prevention, 1600 Clifton Road, Mailstop C-12, Atlanta, GA 30333, USA, or by e-mail to [ededitor@cidod1.em.cdc.gov](mailto:ededitor@cidod1.em.cdc.gov).

*Perspectives:* Contributions to the Perspectives section should provide insightful analysis and commentary about new and reemerging infectious diseases or related issues. Perspectives may also address factors known to influence the emergence of infectious diseases, including microbial adaptation and change; human demographics and behavior; technology and industry; economic development and land use; international travel and commerce; and the breakdown of public health measures. Articles should be approximately 3,500 words and should include references, not to exceed 40. Use of additional subheadings in the main body of the text is recommended. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text. Photographs and illustrations are optional. Provide a short abstract (150 words) and a brief biographical sketch.

*Synopses:* Submit concise reviews of infectious diseases or closely related topics. Preference will be given to reviews of emerging and reemerging infectious diseases; however, timely updates of other diseases or topics are also welcome. Synopses should be approximately 3,500 words and should include references, not to exceed 40. Use of subheadings in the main body of the text is recommended. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text. Photographs and illustrations are optional. Provide a short abstract (150 words) and a brief biographical sketch.

*Dispatches:* Provide brief updates on trends in infectious diseases or infectious disease research. Include descriptions of new methods for detecting, characterizing, or subtyping emerging or reemerging pathogens. Developments in antimicrobial drugs, vaccines, or infectious disease prevention or elimination programs are appropriate. Case reports are also welcome. Dispatches (1,000 to 1,500 words of text) should not be divided into sections. Provide a short abstract (50 words); references, not to exceed 10; and figures or illustrations, not to exceed two.
